# Travel Mate

Team name : Reabrock Coders

# PROBLEM STATEMENT

**PS1 : The Last Mile Paradox: Accessible Mobility Under Uncertainty**

The shortest route on a map is not always one a traveller can actually use. So, we have developed a mobility platform that selects routes according to the traveller’s real needs, not just the distance involved.

# CHALLENGES

## ROUTE VULNERABILITY

Routes can become unsafe or unavailable without warning due to closures, ramps, accidents and theft-prone areas..

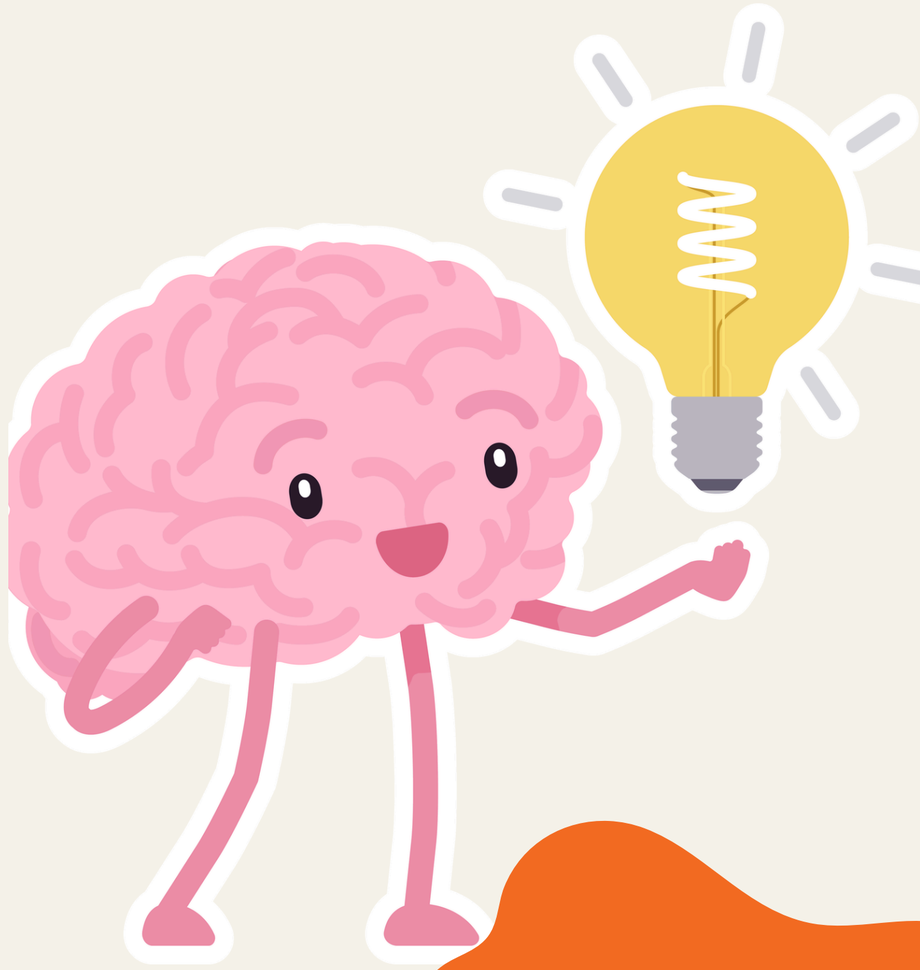

## COST-TIME TRADE OFF

Variable fares and delays make it hard to find an affordable route and calculate exactly when to leave.

# SOLUTION

We turn road intelligence into route decisions. Our platform checks route complexity using safety, road and accessibility data, then finds an affordable route and the right time to leave, adapting in real time when conditions change.

# USER WALKTHROUGH

## ROUTE INFO

- Route Vulnerability Check,Report
- Amenity Quality Check

## COST AND DEPATURE ESTIMATION

- Cost Efficient Journey
- Estimate Depature Time

# TECH STACK

**01** **FRONTEND:**
HTML, CSS, Java

**02** **MAPPING:**
Leaflet.js, OpenStreetMap

**03** **DATABASE:**
Firebase Firestore

**04** **BACKEND:**
Node.js, Express.js(planned)

**05** **AI (FUTURE)**
Python, machine learning and data analysis

# COMPETITIVE LANDSCAPE

| Feature | Google Maps | Travel Mate |
|---|---|---|
| Prediction of departure | No | Yes |
| Route safety | No | Yes |
| Cost effectiveness travel | No | Yes |
| Integrated local assistance | No | Yes |

# BENEFITS

**01**

**ECONOMICALLY EFFICIENT**

**02**

**WAITLESS TRANSIT**

**03**

**SAFER JOURNEYS**

**04**

**REDUCED HASSLE WITH PUBLIC FACILITIES**

# NEXT STEPS

## AI POWERED ROUTING

### COMPLETE

Personalized route recommendations using machine learning.

## REAL-TIME ALERTS

### EXPAND

Instant notifications about traffic, accidents and route closures.

## COMMUNITY REPORTING

### IMPLEMENT

Allow travellers to report unsafe areas and accessibility issues.

## SMART TRANSPORT INTEGRATION

### MONITOR & IMPROVE

Integration with buses, metro, trains and other transport services.

# THANK YOU
